## Denim Hotwater Suit REF #: DHWS

Denim Hotwater Suit has been developed over the past 20 years. The suit is based around a unique heavy anodized aluminum water distribution valve, with its unique 360 degree stainless steel quick-connector. The water flows along an anti-kink rubber pipe profile, designed by, and unique to, Northern Diver.

The Pipes are held in place by a padded neoprene cover for comfort. All pipe runs are directed for comfort during those long bell runs.

The arms and legs can be trimmed to length and the pipe passed backwards through the ladder hole adjusters. There is the facility on the pipe, for the front chest and back neck, to take a hot water feed to the mask to heat the faceplate.

The suit is supplied with a 1/4" inline double-barb plastic connector
